

ROADHAWK DC-1

ROADHAWK DC-1 FORWARD FACING BLACK BOX CAMERA SYSTEM.

IN THE EVENT OF A NON-FAULT ACCIDENT THIS DEVICE CAN PROVIDE THE EVIDENCE REQUIRED TO EXONERATE A DRIVER.

- **SAVE TIME, SAVE MONEY** and **PROTECT YOUR NO CLAIMS BONUS**
- Compact, quick and easy to install or remove unit. 'Always-on' system requires zero maintenance and a single unit can be used in multiple vehicles.
- Stores up to 48 hours of video using a larger memory card.
- Data is recorded on a constant loop in 1 minute segments, overwriting old files once the memory is full. Events recorded by manual activation or when impact or harsh acceleration/ deceleration is detected by the G-Force Sensor are tagged and saved in an event folder.
- 2 Year warranty and UK customer support.
- Reduces fleet and fuel costs. Proven to modify driver behaviour.
- Forward facing Wide Dynamic Range 120 degree camera. Allows higher quality images to be captured especially in adverse lighting conditions.
- GPS information storage including time, speed, direction and location.
- 'Parking' mode function acts as in-car CCTV to record damage or vandalism when the vehicle is parked for set periods of time.
- Still photograph function at the press of a button.

features ▼

- Forward facing WDR 120 degree lens camera system
- 1.3 megapixel CMOS camera
- 30 frames per second
- VGA recording quality
- MPEG4 compression
- Internal audio microphone
- Up to 48hrs record loop time
- Overwrite function
- SD Card: 32GB SDHC support
- Built-in GPS with Google Map support
- G-Force shock sensor built-in
- 3M VHB Sticky window mounts included
- DC 12v to 24v operation (power plug supplied)

Internal and External Surveillance:

Complete vehicle protection using a single CMOS, wide dynamic range camera and internal audio mic. Essential data is stored on a constant loop. Fully time/date stamped evidential quality video, audio, G-Force and GPS data.

PC Software included:

Video analysis software included, providing full video control displaying GPS information and overlay on Google Map.

ROADHAWKDC-1

- **Forward facing camera with built-in microphone:** Clearly record video and audio from the WDR 120 degree camera with built-in audio mic. Increased low light capability captures higher quality images even in adverse lighting conditions whilst maintaining relatively small file sizes. A built-in mic captures audio from within the vehicle, although this can be disabled if preferred.

- **Black box Recorder:** Video and GPS data is recorded on a constant loop in 1 minute segments, overwriting old files once the memory is full. This allows up to 48 hours of video and data to be stored. Events recorded by impact or manual activation are tagged and saved in an event folder. Tagged files save the video and data for the 10 seconds before and after impact or manual activation.

- **Built-in GPS and G-Force Sensor:** The 3G sensor activates at the moment an accident occurs and automatically starts recording protected images. In addition it can record the vehicle's acceleration data, allowing you to check the conditions of an accident in detail using both the images and data.

- **Compact and Zero maintenance:** The black box camera sits discreetly at the top of the windscreen behind the rear view mirror. The 'Always-on' system requires zero maintenance and units can be fitted and removed in minutes. A single unit can therefore be used in multiple vehicles.

- **RoadHawk viewing software:** The DC-1 is supplied with simple to use PC viewing software which is compatible with all versions of Windows. Even without the viewing software, the standard MPEG4 video files can be played on any computer.

▼ client programme

- **Power supply:** Unit is supplied with a standard lighter socket adaptor. Hard wiring the system direct to the vehicle to a live ignition is possible and the 'parking mode' can be employed so the camera will continue to operate when the vehicle is not in use for a set period of time for added protection against damage or vandalism.

- **Full 2 year Warranty:** No quibble 2 year warranty and UK based customer service support team.

RoadHawk DC-1 designed for:

Fleet Management • Personal Vehicle Protection • Taxi and Private Hire Vehicles
• Law Enforcement • In-Car CCTV Surveillance • Blue Light Services
